

DISAM PUBLICATION ORDER FORM

DISAM/DR | 2475 K Street, Building 52 | Wright-Patterson AFB, OH 45433-7641
 Telephone: DSN 713-3300 or Commercial (937) 713-3300

DISAM textbooks are provided to support students attending DISAM resident and on-site/mobile training courses. The texts are available online at: <http://www.disam.dsca.mil/pages/pubs/default.aspx> and can be downloaded and/or printed at no charge. If stocks are above projected classroom needs, limited numbers of printed copies may be available for shipment to other organizations and/or individuals at the prices noted. To order any of the publications listed below, please fill-in the quantity you desire and the address where you would like your publications shipped. Non-US government organizations must pay based on the unit prices listed below, which include postage. In addition to mailing this form to the address listed above, private organizations should include a check made payable to "The Treasurer of the United States" for the full amount in US dollars. Large quantity purchases by US agencies can be executed via a MIPR/PR or other intergovernmental funds transfer document utilizing the price list below.

The Management of Security Cooperation (Edition 35.0)

This book provides an explanation of the US security assistance program, to include a description of the various program elements, the statutory and policy basis for security assistance, the US government organizational structure for security assistance, foreign military sales (FMS) program/case development, financial management, logistics support and management philosophy, international programs, foreign purchaser and industry perspectives, and overseas operations. This publication examines the security assistance program as a total system process. Although various Department of Defense directives, instructions, and manuals are cited in this publication, it is published for instructional purposes only and does not necessarily represent official US government policies. Note that the online version of the text provides the reader with changes which have been incorporated since the latest print release.

FMS Customer Financial Management Handbook (Billing) (10th Edition)

This book is intended to provide an explanation of the financial aspects of the US FMS program, with emphasis on FMS billing and reporting. This publication describes “how” the FMS financial system works and in many instances, delineates “why” this financial system is designed to function as it does. While the US Department of Defense (DOD) is always receptive to suggestions to improve FMS financial procedures, readers of this publication should observe that many such procedures are followed because of legal requirements contained in US public law. As a result, DOD very often has little flexibility in the financial administration of the FMS program. This publication does not take precedence over officially published US government directives, instructions, or manuals.

The Security Assistance Management Manual (SAMM) [DOD 5105.38-M]

The SAMM provides in a single volume information and instructions needed at all levels within the Department of Defense to carry out responsibilities of the Secretary of Defense for administering US Military Assistance and Foreign Military Sales Programs and related activities. Subjects unique to these programs are covered in detail; those affecting program administration, but which are of general application to other DOD programs, are referenced and summarized if appropriate. The SAMM has been structured to capitalize on the flow of security assistance functions and take advantages of the fact that many of the topics have a natural interrelationship and correspondingly logical interactions. Note that the online version available at the previously noted URL is the “official” SAMM and includes all the most recent electronic changes. The printed version is only current as of the print release date.
